Business News Northern Ireland

Welcome to our round up of the latest business news for our clients. Please contact us if you want to talk about how these updates affect your business. We are here to support you!

Wishing you all a Happy Christmas and prosperous New Year!

Christmas is a season of enjoying the simple things that make life beautiful. May you have great memories that will permanently touch your heart.

We wish you so much joy during this season and all through to the New Year.

Looking for some New Year business ideas?

If you are looking for some new business ideas then ask us for a copy of our guide called “57 Ways to Grow Your Business”! Our publication is packed full of bright ideas for the Serious Entrepreneur and starts with the four basics of growth.

All the ideas in this guide ultimately revolve around four basic insights about growing a business:

- Increase the number of customers;
- Increase the number of times each one does business with you;

- Increase the average value of each transaction; and
- Increase your own effectiveness and efficiency.

57 Ways to Grow Your Business

Bright Ideas for the Serious Entrepreneur

Here are some other business principles that we explore in the guide:

- What you can measure you can manage;
- Build in unique core differentiators and focus on them constantly;
- It's more important to be different than it is to be better;
- Cutting the price is always an option but there is usually a better way – increasing value;
- Break compromises and lower the barriers to people doing business with you;
- Systemise every aspect of your business;
- Empower your team to make it right for every customer; and
- Create a clear and detailed action plan.

Ask us for a copy – you never know there may be a gem or two in there for you to help you grow faster!

Power up your business with Innovation!

Innovation has generally been recognised as essential for value creation, both for individual companies and for the UK economy as a whole. The development of new ideas, processes and technologies and their flow across different sectors is a significant driver of economic growth and productivity. Recently, innovation has also

been identified as crucial to the transition of the economy away from fossil fuels and carbon-intensive business activities.

There are many factors that affect whether and how businesses innovate, for example the availability of skills and capital and government policy measures such as tax incentives.

However, none are more important than the company's own culture, capabilities and internal systems – all of which are aspects of its governance. Unless companies are governed in a way that is conducive to innovation, they are unlikely to be in a position to take advantage of new opportunities.

Our most innovative clients share some key characteristics:

- They invest in activities with uncertain outcomes for which the likely commercial return is difficult to quantify and the risk of failure is higher than normal;
- They have a culture which encourages flexibility, experimentation and a high level of individual decision making; and
- They require a longer-term time investment horizon than many other kinds of business activity.

Research and Development (R & D) is the process of taking an innovative idea and transforming it into a fully-fledged product or procedure.

If you are looking for long term finance to support innovation then you will need to ensure your management accounts are up to date, you make available current detailed lists of debtors and creditors, and you might need up to date projections before an expert will consider your application.

In the recent Autumn Statement, the government announced a new simplified research and development (R&D) tax relief, combining the existing R&D expenditure, credit and assembly schemes.

Please talk to us about R & D tax breaks and long-term finance, our independent experts have many years of experience and success in advising business across a wide range of sectors.

Building business resilience

The British Business Bank's Guide to building business resilience contains impartial, practical, and actionable information and support to help smaller businesses manage their costs, boost their long-term profitability, and increase their resilience.

There is guidance on everything from energy efficiency to investing in technology, included to help make your business more innovative and resilient.

Other topics covered in the guide include:

- Foundations for growth;
- Managing business costs;
- Securing funds and controlling debt;
- Focusing on customers;
- Optimising your supply chain; and
- Controlling staff overheads.

See: [Guide to building business resilience - British Business Bank \(british-business-bank.co.uk\)](https://www.british-business-bank.co.uk)

Protecting Employees from Stress at Work

The Working Minds campaign has been created by the Health and Safety Executive (HSE), Britain's national regulator for workplace health and safety is committed to improving the health of workers.

Tackling stress isn't just the right thing to do, it's a legal obligation. Working Minds can help you make it a routine priority for your business.

There are three main reasons employers should be looking to prevent stress and support good mental health in business:

1. It's the law;
2. It's good for business; and

3. It's the right thing to do.

Whether you're a small business or a large corporation, the law requires all employers to prevent work-related stress to support good mental health in the workplace.

It's important to remember that in the end we're all just people – and every one of us face pressures in and out of the workplace. By treating each other with respect and compassion at work we support our teams and colleagues to stay well.

The earlier a problem is tackled, the less impact it will have for the person and your business. Stress affects people differently – what stresses one person may not affect another. Factors like skills and experience, age, or disability may all affect someone's ability to cope.

You can get started today with these 5 steps:

1. Reach out and have conversations.
2. Recognise the signs and causes of stress.
3. Respond to any risks identified by agreeing action points between employer and worker.
4. Reflect on the actions taken – have things improved?
5. Make it Routine to check back in on how things are going.

If you think that a worker is having problems, encourage them to talk to someone, whether it's their line manager, trade union representative, GP, or their occupational health team.

Exploring Closure Options for Solvent businesses

There are many reasons a solvent company needs to be brought to an end; perhaps due to retirement, illness, or simply a desire to extract the proceeds tied up in the company.

Once a decision has been made to cease trading and begin winding up the company's affairs, the next step is to determine the most appropriate way of closing the business down officially. When looking at your options, there are a number of processes which should be fully explored to ensure maximum suitability is achieved.

This decision will be determined, in the main, by the financial position of the company at the time of closure, as well as the future ambitions of its directors and shareholders.

Strike Off/ Dissolution

Strike off – also known as dissolution – is an informal way of closing down an unwanted limited company quickly and easily. An application for voluntary company strike off is made using the DS01 form submitted directly to Companies House. This will then be published in the Gazette, with any parties affected by the proposed strike off invited to make an objection. So long as no objections are received, the company will be removed from the register held at Companies House and the company will subsequently cease to exist as a legal entity.

Any property or assets remaining in the company at the time of strike off will become *bono vacantia* and ownership will pass to the Crown, therefore any loose ends should be tied up in advance of the application being made.

While there is the possibility for a company which has been struck off to be restored to the register at a later date, this can be a lengthy and complex process, so strike off should only be opted for if there is no likely reason the company will be required again in the future.

Make The Company Dormant

If there is a possibility that the company may be required at some point, making the company dormant may be the most appropriate solution. When a company is marked as dormant it remains on the Companies House register, meaning it can be immediately resurrected if trade recommences. Minimal filing obligations are required during this period and all outstanding tax liabilities and obligations must be fully up to date before HMRC will consider your request.

Making a company dormant prevents another entity incorporating a company using the same name; this can be hugely beneficial in retaining the valuable reputation that has been built up over the years of trading. As a company can remain dormant for any length of time it chooses, this could be a great option for those who know they don't currently require the company but are unsure as to what the future may hold.

Members' Voluntary Liquidation (MVL)

If there are significant assets (typically in excess of £20,000 in total) then opting to place the company into liquidation could be the most cost-effective and tax-efficient way of extracting these funds. Solvent liquidation is achieved using a formal process known as a Members' Voluntary Liquidation (MVL) and must be overseen by a licensed insolvency practitioner. With an MVL, money is distributed to shareholders as capital gains rather than income; as capital gains are taxed at 20%, this can

represent a huge tax advantage. Directors can also benefit from Business Asset Disposal Relief (up to a lifetime limit of £1m worth of gains) which halves the effective capital gains tax rate down to just 10%.

As an MVL involves the input of a licensed insolvency practitioner, there are professional fees which need to be accounted for when considering the suitability of this process; however, many find that this cost is eclipsed by the potential savings able to be made elsewhere.

Directors will be required to sign a declaration of solvency, attesting to the fact that the company is able to fulfil its obligations to creditors within 12 months of the date of liquidation. Falsely swearing a declaration of solvency is considered an act of perjury, therefore, it is vital an accurate Statement of Affairs is drawn up and any contingent liabilities accounted for before the company enters liquidation.

Please contact us if you would like further information on your options, we are here to help!

Consultation on new Climate Change Agreements scheme

The Department for Energy Security and Net Zero (DESNZ) has launched a consultation seeking views on proposals for a new six-year Climate Change Agreements scheme to begin in 2025.

The new scheme would add three new target periods running from 2025 to 2030, resulting in three certification periods running to 31 March 2033. It will provide further reductions in the Climate Change Levy for eligible participants.

The scheme would be open to new entrants who qualify under the current eligibility criteria.

The consultation outlines:

- aspects of the current scheme that will be retained for the new scheme, as well as some policy decisions following on from proposals in a previous DESNZ consultation.
- further proposals for a future scheme, including the possibility for new sectors to apply to be eligible for the scheme, target setting, reporting and how performance will be measured.

See: [Climate Change Agreements: consultation on a new scheme - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/consultations/climate-change-agreements-consultation-on-a-new-scheme)

Funding for digital supply chain innovation

The [Made Smarter Innovation | Digital Supply Chain Hub](https://www.gov.uk/government/consultations/made-smarter-innovation-digital-supply-chain-hub) (DSCH) is inviting applications from businesses interested in developing and deploying digital technology solutions in the DSCH testbeds.

A supply chain testbed can be defined as an end-to-end supply chain environment, where technologies can be deployed and tested using real data but without risking business disruption.

Together with the testbed companies, the DSCH has identified seven potential challenge areas:

- standardised naming system for automotive spare parts;
- project finance and market modelling in the emerging hydrogen supply chain;
- digital product passport for the textile supply chain;
- connected life cycle assessment in the textile supply chain;
- logistics pricing engine in the textile supply chain;
- data driven best before date in the food supply chain; and
- a marketplace for investment in sustainable farming.

Each challenge comes with £100,000 available for a tech solution provider to work with an Industry Challenge Sponsor to address critical supply-chain challenges and develop a solution which will be deployed into one of the testbeds. Find out how to [unlock funding for digital supply chain innovation](#).

Experience within the manufacturing sector is not essential, however, knowledge of how to apply this to industry and relevance to the challenge is required. The deadline for applications is 22 December 2023.

Ambition To Grow competition

Invest NI is looking for Northern Ireland's most innovative and ambitious businesses to join a new cohort of their Ambition to Grow competition. The competition offers businesses a chance to receive up to £45,000 in funding and ultimately become part of Invest Northern Ireland's client portfolio.

The banner features a dark purple background. On the left, the text 'AMBITION TO GROW' is written in large, white, bold, sans-serif capital letters. Below this, a white rectangular box contains the text 'Exports • Workforce • Innovation' in a smaller, black, sans-serif font. At the bottom left, white text reads 'Receive up to £45,000 & Invest NI support to help your business grow'. On the right side, there is a circular image showing two scientists in white lab coats working in a laboratory. One scientist is looking through a microscope, while the other is looking at a piece of equipment. The image is framed by several concentric green circles. In the top right corner of the banner, the 'Invest Northern Ireland' logo is visible, consisting of the text 'Invest Northern Ireland' next to a green leaf-like icon.

Invest NI will provide support to create great jobs and sell your innovative products or services outside of Northern Ireland. They are looking for businesses that must:

- be ambitious, innovative businesses with a clear plan to grow sales to customers outside Northern Ireland;
- have a product or service with a strong unique selling point to take to markets outside Northern Ireland;
- be able to outline the potential for new employment within the business and demonstrate how these new roles will contribute to growth of the business into markets outside of Northern Ireland;
- be able to demonstrate the need for government support for new employment and market development activities to take place; and
- have annual turnover under £1 million or sales to customers outside Northern Ireland of less than £300,000.

Ambition to Grow is designed specifically to help micro, small, and medium local enterprises to create jobs and grow exports.

Financial support

Funding will be awarded to applicants on a competitive basis. Applications will be assessed and scored, with the highest-scoring companies in each Invest NI region awarded funding following a successful validation interview.

A maximum of £45,000 is available for each successful application as follows:

- Up to £30,000 towards new employment within the business. The level of this support will depend on the number and type of new positions, the salary levels proposed and the number of hours each new role is contracted for;
- Up to £10,000 towards business development activities at a support rate of up to 50% of eligible costs which can include expenditure on market, product, or skills development; and
- £5,000 on the completion of an [Export Health Check](#), development of an [Export Marketing Plan](#), and completion of an [Innovate NI Self-Assessment](#).

Financial support payments are not up-front and are dependent on the execution of specific activities as outlined in any offer of support such as job creation or exporting.

Ambition to Grow has been developed as a digital application to support businesses across the Invest NI regional office areas.

This programme is primarily aimed at businesses that are not currently Invest NI customers. Businesses must meet all of the following criteria:

- be ambitious, innovative businesses with a clear plan to grow sales to customers outside Northern Ireland;

- have a product or service with a strong unique selling point to take to markets outside Northern Ireland;
- be able to outline the potential for new employment within the business and demonstrate how these new roles will contribute to growth of the business into markets outside Northern Ireland;
- be able to demonstrate the need for government support for new employment and market development activities to take place; and
- have annual turnover under £1m or sales to customers outside Northern Ireland of less than £300,000.

The Ambition to Grow is now open for applications and closes on Friday 12 January 2024.

Increase in maximum taxi fares

New taxi fare rates have been applied from 5 December 2023 to address the challenge of taxi availability.

Maximum fares will increase by 9.5 per cent during the day and 19.5 per cent at all other times. Drivers may charge less than the maximum if they wish.

This increase was put in place by DfI in the context of challenges about the availability of taxis, particularly in the evenings and at weekends, which has led to concerns around public safety.

The detail below presents the four rates by operating times and a summary of the approximate cost of the first mile of a journey by taxi (which includes the initial charge) and then the added cost for each additional mile.

- Rate 1: (Monday to Friday, from 6am to 8pm) Initial charge of £3.20, approximate charge for first mile £4.20 and £1.86 charged for all additional miles.
- Rate 2: (Monday to Thursday, from 8pm to 6am) Initial charge of £4.00, approximate charge for first mile £5.10 and £2.03 charged for all additional miles.
- Rate 3: (Friday 8pm to Monday 6am and specified days) Initial charge of £5.00, approximate charge for first mile £6.10 and £2.03 charged for all additional miles.
- Christmas and New Year Rates: (From 2pm on Christmas Eve to 6am on 27 December and from 8pm on 31 December to midnight on 1 January) Initial Charge £5.80 and approximately £7.70 for first mile) and £3.60 for every additional mile.

Research survey to support NI artists and the arts community

The Arts Council of Northern Ireland is conducting a survey to help them understand the working and living conditions of artists in Northern Ireland.

This survey is open to all artists and creative professionals currently or recently based in Northern Ireland, regardless of whether they have interacted with the Arts Council or not.

The survey aims to help the Arts Council make a stronger case about the need for additional investment and resources and inform updating of their Strategic Plan (2024-34).

The results from this research project will support the implementation of the plan and help the Arts Council monitor progress.

Participation in this survey involves answering a range of questions relating to your career, participation in the arts, and your views on opportunities and challenges in the arts sector.

Taking part is voluntary, and you can skip any question that you do not wish to answer.

The survey will take approximately 15 minutes to complete.

See: [Research survey to support NI artists and the arts community \(nibusinessinfo.co.uk\)](https://nibusinessinfo.co.uk)

Tenfold NetZero Accelerator

Digital Catapult is working alongside the Department of Agriculture, Environment and Rural Affairs (DAERA) to run the Tenfold NetZero Accelerator Programme in Northern Ireland.

This pilot programme aims to begin the development of an innovation ecosystem and to identify up to six challenges from organisations within sectors under DAERA's remit that would benefit from innovative digital solutions and take them to the proof of concept stage.

The programme has been designed specifically for businesses to solve some of the industrial challenges that are inhibiting the drive towards NetZero in their sector.

Participants are invited from the following sectors:

- agri-food,
- environment,
- marine and fisheries,
- forestry, and
- rural affairs.

Together with the technologists from the Digital Catapult, participants will get a chance to develop proof of concepts as a first step to addressing the defined challenges, utilising a range of advanced digital technologies including 5G and Internet of Things, artificial intelligence and machine learning, and virtual and augmented reality technology.

Industry partners must each be able to contribute £20,000 of funding towards the development of the solution to their challenge.

See: [Tenfold NetZero Accelerator \(nibusinessinfo.co.uk\)](https://nibusinessinfo.co.uk)
